The reimagined 'Cortina': DAM's New Vision for Sustainable Lighting

The reimagined 'Cortina': New Vision for Sustainable Lighting

The new edition of the 'Cortina' lamp from DAM was redesigned and it is even more sustainable now. With an exclusive construction made from agglomerated dark cork that eliminates the use of coloured metal sheets, the new design highlights the simplicity of utilitarian light while enhancing its environmental commitment.

Inspired by a block of cork that appears to float, DAM's 'Cortina' brings a touch of nature indoors, creating a warm atmosphere with its earthy tone and texture. The lamp transforms light into a delicate element like a curtain, shaping light and shadows in a vertical manner.

'Cortina' is available in a practical size, suitable for different space configurations, and integrates a standard LED lamp ensuring efficiency and longevity. The carefully designed shape that enhances the light in harmony with the cork makes the 'Cortina' an ideal choice for environments that value aesthetics and ecological responsibility, whether in a workspace or a gathering space for family and friends.
