

## These chairs are for adventurers!

With GAGO & SACADURA, DAM brings us a new story and links us to our past, projecting values to the future.

**GAGO & SACADURA chairs honour the first aerial crossing of the South Atlantic realized in 1922 by the pilot Sacadura Cabral and the navigator Gago Coutinho.**

Even at the beginning of the last century, there were geographical areas of the planet that lived disconnected from each other and these Portuguese adventurers created connections that enriched the world.

Inspired by the shape of the aviator's helmet and with arms elegantly curved like the wings of a floatplane, the chairs' upholstery rests on a platform of turned wooden beams. The base of the GAGO chair that resembles the floats of a floatplane, reinforces the impression to users to take off in an exciting adventure. On the back of the chairs is the inscription "1922, 8383 km", recording this historic milestone of the aeronautics that linked Lisbon to Rio de Janeiro.

GAGO & SACADURA travel through spaces of familiar conviviality or metropolitan agitation, making each place memorable. Let's educate and perpetuate our History with exciting products! Telling stories is what connects us to our humanity!
