Description

The chair SACADURA honours the first aerial crossing of the South Atlantic realized by Sacadura Cabral and Gago Coutinho in 1922. Inspired by the shape of the aviator's helmet and with curved arms like the wings of a seaplane, the SACADURA upholstery rests on a platform of turned wooden beams, giving users the impression of taking off on an adventure. On its back is the inscription "1922, 8383 kms", recording this historic feat of the aeronautics. SACADURA travels through spaces of familiar conviviality or metropolitan agitation, making each place memorable.
